Ana Vogt

Junior Front-end Developer

Profile

After 16 years in education, I decided to take a new career direction. I came across SheCodes in October 2023 and started the Junior Frontend Developer apprenticeship in January 2024, which I successfully completed in July 2024. I am currently expanding my skills through a Python course and keeping up to date with Frontend Masters and Mimo. Now I am looking for an internship or a permanent position to gain practical experience and further deepen my knowledge.
